DATACARD CERTIFIED SUPPLIES

SP35 / SP55 PLUS SUPPLIES

FOR THE DATACARD® SP35 PLUS AND SP55 PLUS CARD PRINTER

ENSURE PEAK PERFORMANCE

Insist on only using Datacard® Certified Supplies for your Datacard® SP35 Plus and SP55 Plus card printers. Designed exclusively for these card printers, our printheads, ribbons and cleaning supplies can help you achieve the best image quality, most reliable printer performance and lowest possible cost-per-card. Datacard® ribbons also leverage our patented RF (radio frequency) technology to provide automated color and image density adjustment, ribbon usage tracking and ribbon conservation.

INTELLIGENT SUPPLIES TECHNOLOGY™ IN THE TRUEST SENSE

When a Datacard® ribbon is loaded into the SP35 Plus or SP55 Plus card printer, the printer driver automatically adjusts printer settings to match the ribbon type, helping to ensure the best possible image quality on the cards. The printer and supplies continue working together to track print ribbon consumption and notify you of an upcoming ribbon replacement. Our SP Plus Series card printers feature Datacard® proprietary ribbons designed specifically for the SP35 Plus and SP55 Plus card printers. When the printer recognizes that a Datacard® ribbon is installed, all enhanced product features are enabled and successful card printing can begin. The printer will only print color images when Datacard proprietary color ribbons are installed. Datacard is your exclusive source for proprietary ribbons for the SP35 Plus and SP55 Plus card printers.

REMARKABLE IMAGE QUALITY

Datacard® color panel ribbons for the SP35 Plus and SP55 Plus card printers tap into our exclusive Advanced Imaging Technology™ to give you extremely crisp, vivid photos, graphics and text on full- or one-color cards. On-screen image controls enable smooth, uniform solid backgrounds, improved color matching with cameras and clearly defined edges and fine text. We also offer a range of high-quality Datacard monochrome ribbons for reliable single-color card printing.

MAXIMUM RIBBON YIELDS HELP REDUCE COSTS

Datacard ribbons for the SP35 Plus and SP55 Plus card printers offer high-yield rolls. Each ribbon is longer, allowing for more printed images per roll.

A lower yield YMCKT ribbon is also available for customers with lower-volume printing needs. The SP35 Plus and SP55 Plus card printers also feature our exclusive ribbon saver feature. When printing with Datacard monochrome ribbons, the printer advances the ribbon just enough to print an image, rather than the traditional full card width advancement. This feature can potentially double and even triple the standard yield of your Datacard monochrome ribbons! Datacard color panel ribbons also take advantage of the ribbon saver feature.

The SP35 Plus and SP55 Plus card printers include intelligent features that automatically identify the color panel ribbon without the need to advance the ribbon, saving one complete panel set during each printer initialization.

INSTALLATION IS A SNAP

If you think operating an SP35 Plus or SP55 Plus card printer is easy, try replacing the supplies. Print ribbons and cleaning sleeves snap right into place with no tools or additional adjustments required. Printheads practically align themselves. Simply open the printer's cover, swap old for new and resume printing.

CONVENIENT SUPPLY KITS

Datacard Group understands that producing quality card images takes a combination of quality ribbons and a well-maintained, quality printer. One of the simplest ways to help keep your printer maintained properly is to perform regular cleaning operations.

For the SP35 Plus and SP55 Plus card printers, we have simplified this process by including an isopropanol cleaning card and adhesive cleaning sleeve in every box of ribbons, all ordered using a single item number. Now, when it is time to replace your ribbon, you will always have cleaning supplies available to help maintain optimum performance. Additional cleaning supplies and accessories can also be ordered separately, when more frequent cleaning intervals are required.

YOUR BEST CHOICE FOR SUPPLIES

Protect your investment in Datacard® solutions by only using Datacard® Certified Supplies. You can count on Datacard for all your supply needs. We engineer superior performance and reliability into every system-matched supply item we offer. For you, that means smooth printing, brilliant image quality, high security and exceptional performance. Worldwide representation creates a fast, direct connection with the supplies and support you need, when and where you need them. To ensure you are using Datacard Certified Supplies, look for ribbons that feature our distinctive blue cores with platinum flecks®.distinctive *blue* cores with platinum flecks®.

SP35 PLUS AND SP55 PLUS RIBBON KITS

Ribbon kits include all necessary cleaning supplies for the SP35 Plus or SP55 Plus card printer's daily operations. Each kit includes: one ribbon, one cleaning card and one cleaning sleeve. Additional cleaning cards and cleaning sleeves can also be ordered separately.
